Projects

- Online Voting Management**
The Online Voting Management System (OVMS) is a web-based DBMS project revolutionizing elections. It offers secure voter registration, candidate nominations, electronic voting, and real-time result tabulation. With a user-friendly interface, automated notifications, and robust security, OVMS simplifies the process, enhances transparency, and reduces errors.
- Namma Ooru**
Explore our Namma Ooru (Our Town) tourist guide website to uncover hidden gems, local attractions, and vibrant culture. Navigate through curated itineraries, top-rated restaurants, and must-visit landmarks. Immerse yourself in the essence of our town, making the most of your visit. Whether you're a traveler seeking authentic experiences or a local looking to rediscover your city, Namma Ooru has your journey covered.
- Online Quiz Application**
The Online Quiz website is an interactive platform that offers a diverse range of quizzes on various topics. It provides an engaging and educational experience for users to test their knowledge, improve their skills, and challenge their friends. With a user-friendly interface and a vast quiz library, it's a fun way to learn and compete online.
- Personal portfolio website**
A Personal Portfolio website is a digital showcase of an individual's skills, accomplishments, and work. It serves as a professional online presence, allowing creators, artists, professionals, or job seekers to display their expertise and projects. With a sleek design and concise content, it's a powerful tool for personal branding and networking.
